

## How can small and medium businesses increase their productivity?

It doesn't take hours and hours of overtime. By choosing the right UC&C system, companies can improve communications and significantly increase productivity.

Since 2005, Wildix has been helping companies with 50 to 1000 users grow their businesses through UC&C, by creating the first web-based VoIP PBX UC&C system.

# THE FIRST 100% SECURE, EASY-TO-USE, PROFESSIONAL WEB-BASED UC&C SYSTEM

More  
Business

## **+52% increase in web sales**

Only Wildix allows customers to communicate in any way they choose, by connecting the company website with **WebRTC**.

More  
Efficiency

## **25% more time saved on everyday operations** (about 2 hours per employee)

Only Wildix facilitates internal and external communication between companies and their customers from anywhere in the world, via web browser and the app.

Secure  
by Design

## **100% security**

Only Wildix does it all in a simple, secure way with a solution that's protected by design (no **SBCs**, no **VPNs**).

Wildix is for companies that want to increase their productivity with a secure-by-design tool.

Wildix offers hardware products that are perfectly integrated with all the system features: video conference, chat, Presence, attendant console, and much more. Using Wildix, companies see significant cost savings, make their processes leaner, and gain access to new business tools, guaranteeing a positive ROI.

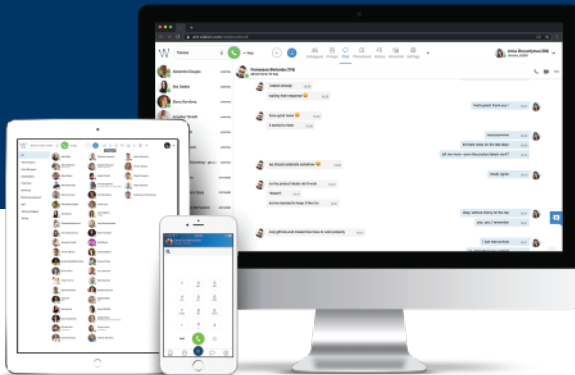

## UCaaS

### Browser-based UC&C

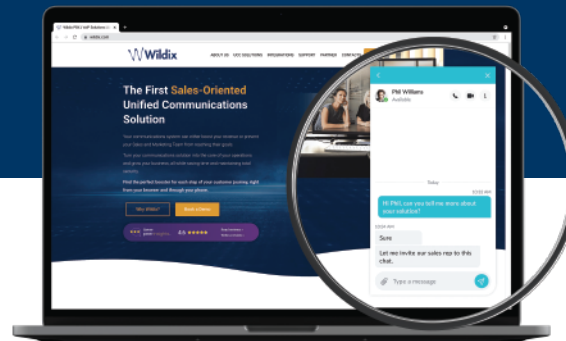

User-friendly software:  
An engaging user experience  
for businesses and customers

## VaaS

### WebRTC Kite

The first WebRTC solution fully  
integrated into a UC platform:  
Offer the best customer service  
over the web.

## HWaaS

### Complete Hardware Infrastructure

The Complete Hardware solution:  
The best choice for System  
Integrators and IT managers

*We feel that we are privileged because  
we ended up with a complete solution that  
meets our demands. Wildix has enabled us to  
develop our product by integrating  
videoconferencing, but also to take a new turn  
thanks to the integration of screen sharing.*

## THE WILDIX CUSTOMER JOURNEY

Run your webinars up to 5k participants, directly from your browser

## Collaboration

Save time in communicating with a unique user experience from the browser

Contact button on your website to be reached and reach out to your prospects

The fully web-based video conference platform to convert your leads into customers

Monitor and control your sales journey thorough statistical analysis of your communications

## Software Integrations

Application programming interface & ready-to-use integrations

*Right now, we're in a situation where a portion of our staff is not in the office, so being able to answer an email from them and say 'download this app and sign in, I'll change your settings and your phone will work just like you're at your desk.' That's not something we thought we would use a ton of, but it turns out, it was a really great thing to have.*

Wildix doesn't work with distributors, but rather with a network of certified regional business partners. That's because the value of the product is fed by the professionalism of our selected installers, who help the customer in the growth of their business.

## THE WILDIX CHANNEL

*Before using Wildix we were losing about 10-15 % of calls from existing and potential customers. Thanks to the new communication system, we started looking closer at the data, we've identified where we're failing, and have seen the profit increase of about 10% in the last four months since introducing Wildix thanks to our communications advisors at Channel Comms Ltd.*
